

Rivers That Form Borders

- Reaches along rivers that form state or international borders are not highlighted in thick blue
- USGS stations near border crossings where rivers flow from one state to another have been selected as contenders

Example Map With Red Arrows Indicating Contender Stations Along the Mississippi and Pearl Rivers

Rivers That Form Borders, cont'd

- These stations should be reviewed to confirm that they are the best candidate stations to quantify flows across the state boundaries
- Additional existing stations or new stations should be added where appropriate
